

Table of Contents

Preface	1
Chapter 1: Installing and Configuring Adobe Flex	7
Installing open source Flex 3 SDK	8
Installation directory structure	8
About configuration files	9
Flex compilers	10
Using compc—the component compiler	10
Using mxmhc—the application compiler	11
Installing Flex Builder 3	12
Creating a Flex project	18
UI designer and source code editor	22
Flex LiveDocs	23
Summary	24
Chapter 2: Introduction to Flex 3 Framework	25
How Flex works	26
Compiling and running an application	26
About MXML	28
Understanding namespaces	29
Using namespaces in your code	30
Containers	31
Layout manager	31
Layout containers	34
Using Box, HBox, and VBox containers	35
Navigator containers	36
Form containers	38
Constraint-based layout	39
Using events in MXML	41
Creating custom events	44

Validating and formatting data	45
Restricting user entry	50
Formatting	51
Data binding	52
Using the [Bindable] metadata tag	55
Creating MXML custom components	57
Understanding Flex itemRenderers	63
Drop-in itemRenderers	64
Inline itemRenderers	64
External itemRenderers	65
Summary	66
Chapter 3: Introduction to ActionScript 3.0	67
ActionScript 3.0 language features	67
Strict data typing	68
Runtime exceptions	68
Sealed classes and dynamic classes	68
Method closure	68
XML and E4X	68
New primitive data types	68
Regular expressions	69
Object-oriented programming	69
ActionScript 3.0 fundamentals	69
Variables	69
Access modifiers	71
Packages	71
Classes and interfaces	72
Classes	72
Interfaces	73
Implementing an interface in a class	73
Inheriting classes	74
Functions and methods	75
Named functions	76
Anonymous functions	76
Function parameters	77
Setter and getter methods	79
Flow control and looping	80
If/else statement	81
switch statement	81
Looping	82
Exceptions and error handling	84
try...catch...finally statements	84
Create your own custom Error class object	86
Reserved words and keywords	87

Using ActionScript 3.0 with MXML	88
Using the <mx:script> tag	88
Using the include directive	90
Working with events	91
Registering event handlers	91
Dispatching an event	93
About the target and currentTarget properties	93
Event propagation	94
Capturing phase	94
Targeting phase	94
Bubbling phase	94
Creating custom events	95
Creating and using ActionScript components	97
The commitProperties() method	98
The createChildren() method	99
The layoutChrome() method	100
The measure() method	101
The updateDisplayList() method	101
Summary	106
Chapter 4: Using External API and LocalConnection	107
<hr/>	
Using External API	107
Using the ExternalInterface class	108
Getting information about external container	109
Calling JavaScript code from ActionScript	109
Calling ActionScript code from JavaScript	111
Using LocalConnection	113
Summary	118
Chapter 5: Working with XML	119
<hr/>	
XML basics	119
Understanding E4X	120
The XML object	123
The XMLList object	124
Working with XML objects	125
Using XML as dataProvider	126
Loading external XML documents	129
An example: Building a book explorer	131
Summary	140
Chapter 6: Overview of LiveCycle Data Services and BlazeDS	141
<hr/>	
LiveCycle Data Services	142
BlazeDS	144
BlazeDS vs LiveCycle Data Services	145

LiveCycle Data Services	145
BlazeDS	146
Understanding AMF	148
Summary	148
Chapter 7: Flex Data Access Methods	149
<hr/>	
Flex data access components	149
The HTTPService class	150
Using the HTTPService tag in MXML	150
An example of HTTPService	151
Using the HTTPService class in ActionScript	155
The WebService class	156
Using the WebService tag in MXML	157
An example of WebService	158
WSDL document	160
Using the WebService class in ActionScript	162
Working with SOAP headers	163
The RemoteObject class	164
Using the RemoteObject tag in MXML	165
An example of RemoteObject	166
Working with strongly-typed objects	172
Understanding the Flash Player security sandbox	175
Understanding the cross-domain policy file	176
Creating a proxy service	177
Summary	180
Chapter 8: Communicating with Server-side Java	181
<hr/>	
The HTTPService class	181
Working with XML data	182
Working with JSON data	186
Summary	189
Chapter 9: Debugging Techniques	191
<hr/>	
Flash Debug Player	191
Using client-side logging	192
Flex Builder Debugger	194
The Debug view	196
The Variables view	197
The Breakpoints view	198
The Expressions view	198
Network monitoring	199
ServiceCapture	199
Charles Web Debugging Proxy	200
Summary	200

Chapter 10: Styling your Application	201
Using inline styles	202
Using external CSS files	204
Creating and designing Cascading Style Sheets	207
Loading stylesheets at runtime	210
Summary	215
Chapter 11: Packaging and Deployment	217
Packaging your application	217
Using Flex Ant Tasks	220
Deploying your application	224
Flex deployment options	228
Using a single SWF file deployment	228
Using web-tier compilation	230
Summary	231
Chapter 12: Internationalization and Localization	233
Internationalization (i18n) and localization (l10n)	233
Language	234
Assets	234
Culture	234
Time zones	234
Localization of Flex applications	235
Creating a resource file	235
Creating resource modules	242
Summary	246
Chapter 13: Creating an E-commerce Application	247
The general anatomy of the application	247
Let's start coding	250
The Flex code	251
The Java code	272
Directories and files	276
Summary	278
Index	279
